WHERE INNOVATION **MEETS EXPERTISE**

- Tailored heating solutions
- Heating & plumbing design services
- Pre-plumbed & pre-commissioned products
- Low-carbon heating systems
- Free on-demand courses to enhance your skills

With Joule you get more than just a product. We provide a full wrap around service to fully support you when you choose our products. From your initial enquiry, we can tailor a solution to meet your needs, provide the plans and design for your installation through our dedicated in-house design team and deliver the end product, pre-plumbed and pre-commissioned for an efficient installation.

In addition to this, we also provide free on-demand, online courses and tutorials to enhance your skills and assist you with short, sharp instructions as and when you need it.

Any project is an ideal scenario for embracing renewable heating. From this ultimate blank slate, Joule can help you tailor your property's heating system to meet low-carbon regulations and reduce ongoing utility bills. Joule has developed a wide-ranging portfolio of solutions for heating and hot water systems. So whether it's a heat pump, underfloor heating, or our industry-leading extensive range of hot water cylinders, Joule has the solution for you.
