DAIKIN

A million homes. One heat pump.

NEW

Meet Daikin Altherma 4 H

New high temperature air-to-water heat pump, perfect for any house modernisation.

daikin.eu

A million homes. One easy to install heat pump.

Every home deserves a new life. With the Daikin Altherma 4 H, you can upgrade effortlessly without replacing your existing radiators. Simply swap out your old boiler for our high-temperature heat pump! No major installation work is needed, making the transition quick and hassle free. Designed to operate even in temperatures as low as –28 °C, it ensures year-round comfort, no matter the weather.

Free choice between underfloor heating and radiators
Leaving Water Temperature up to 75 °C at -15 °C outside temperature

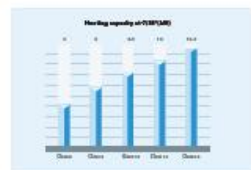
Reliable performance
Operation range down to -28 °C

A million homes. One safe heat pump.

As Daikin Altherma 4 H runs on propane refrigerant, it is also equipped with additional safety components to ensure top safety standards during transport, installation, maintenance and unit operation. With Daikin's advanced safety features constantly standing guard, you can enjoy peace of mind 24/7.

A million homes. One efficient heat pump.

Every home deserves a sustainable and cost-effective heating solution. The Daikin Altherma 4 H is designed with your comfort in mind. Equipped with R290 refrigerant and Daikin's innovative technologies, the unit provides efficient, reliable heating. Enjoy affordable warmth without the worry of high energy bills. Daikin Altherma 4 H delivers best-in-class heating capacity, ensuring your home stays warm — no matter how cold it gets outside.



Space Heating at 55°C up to

Domestic Hot Water up to

A million homes. One silent heat pump.

The Daikin Altherma 4 H is whisper-quiet, operating with exceptional quietness, producing as little as 28 decibels of sound from a distance of three metres. This ensures that both you and your neighbours can enjoy peaceful days and nights, undisturbed by the unit's operation.

Ultra silent
28 dBA from 3 meters

A million homes. One user-friendly heat pump.

With Daikin Onecta app you can monitor the energy consumption and adjust the home temperature directly on your phone - operating your heating system has never been so easy! Additionally, the indoor units features a new, intuitive 5" colour touch screen, which provides a clear overview of your heat pump's status and allows fast and easy installation.

A million homes. One European heat pump.

Our heat pumps are developed and produced in Europe, ensuring fast delivery, quick support and top European quality. Our installers are provided with certified training programmes to ensure the highest standards of installation and service. Anytime you need us, we're near!

One heat pump. Many indoor units combinations.

ECH2O tank with option to connect thermal solar panels
The ECH2O unit is equipped with a thermal DHW tank, available in 300L or 500L sizes, that can be connected to thermal solar panels. The ECH2O technology is based on the fresh water principle; the domestic water is kept separate from the storage tank water, preventing deposits and reducing the risk of Legionella.

Floor-standing unit with integrated domestic hot water tank
All-in-one: compact installation footprint due to factory-mounted connections and components.

Compact Wall-mounted unit
This model is the most compact option but requires a separate tank to provide domestic hot water. This offers flexibility in terms of installation location and tank choice.

DAIKIN ALTHERMA 4 H in 4 easy steps

Interested in Daikin Altherma 4 H or maybe you need more information? We're here to help you.

Step 1
Scan the QR code and go directly to our website.
